

# Event Dashboard & Report

Planning and policy support for hosting events of all sizes.

Changes in the COVID-19 pandemic continue to threaten the exhibition, conference, and sports industries, but data can help leaders plan to host events safely.

Any organization looking to host a show or event has to account for changing information from public health officials. In such a complex environment, how can organizers demonstrate they can operate events in a safe and sustainable way?

Epistemix has worked with city and state leaders in public health and the Exhibition & Conference Alliance to develop a decision support solution that meets the needs for organizers and public health officials. The solution simulates the impact of mask wearing, social distancing, and different levels of vaccination coverage at your event given the changes in the epidemic and vaccination coverage of where attendees are coming from.

The dashboard and report cost \$2,400 and can be used to guide planning decisions up to 9 months in advance. IAEE members get a 10% discount.

## About Epistemix

Epistemix is a leading provider of analytical tools that empower leaders to make better decisions by simulating how diseases, ideas, and behavior spread through populations. We leverage decades of epidemiological experience, diverse datasets, realistic population dynamics, and scientific best-practice to build computational models that forecast the impacts of policy interventions, so that organizations can take informed action.

Contact us to learn more about how to safely plan for your conference, exhibition or event.
